Fogarty® Catheters

Count on the experience of the first name in clot management

Edwards

For over 45 years, clinicians have counted on real Fogarty® catheters to address the real problem of clot management.

The reason is simple. Through collaboration and clinical learning, Edwards Lifesciences has continued to evolve and advance its Fogarty catheters to meet the exacting needs of specialists for vascular surgery and hemodialysis access procedures. Their proven performance and manufacturing quality has led surgeons to specify genuine Fogarty catheters—available exclusively from Edwards—for millions of procedures worldwide.

Fresh, Soft Emboli/Thrombi

Fogarty Arterial Embolectomy Catheter

Preferred catheter for simple, rapid removal of soft, fresh emboli and thrombi from the arterial system

- Hand tied using a recessed winding technique to secure balloon to catheter
- Balloon exhibits a symmetry that exerts uniform contact with vessel walls for even pressure and precise traction
- Soft, rounded tip promotes easy insertion for reduced trauma, arteriopuncture, and plaque avulsion

Fogarty Fortis Arterial Embolectomy Catheter

Catheter of choice for more aggressive removal of emboli and thrombi from the arterial system

- Construction and materials designed to be more durable and withstand greater pull-force
- The addition of barium to the catheter shaft material provides radiopacity

Fresh, Soft Emboli/Thrombi, Temporary Occlusion, Infusion

Over-the-wire Fogarty Thru-Lumen Embolectomy Catheter

Multi-use, guidewire-compatible design enables removal of soft, fresh emboli and thrombi as well as fluid delivery, temporary occlusion, and blood sampling

- Tough, compliant Fogarty balloon conforms to the vessel to maximize clot removal while minimizing trauma
- Provides the solution for distal thrombus removal in the arterial system
- The addition of barium to the catheter shaft material provides radiopacity

Mature, Adherent Thrombi

Fogarty Adherent Clot Catheter

Used to dislodge adherent material in native vessels and synthetic grafts

- Ideal for extracting the arterial plug and thrombus that is too resistant for an elastomeric balloon
- Corkscrew design increases the surface area for entrapping fibrous material
- Radiopaque and flexible for negotiating a forearm loop graft

Fogarty Graft Thrombectomy Catheter

Shown to be effective at clearing adherent thrombus from synthetic grafts, such as aortofemoral polyester woven grafts

- A less slow and cumbersome alternative to tools such as endarterectomy loops or spatulas

Venous Thrombi

Fogarty Venous Thrombectomy Catheter

Designed for removing thrombi in the venous system

- The long, soft tip facilitates advancement past the venous valves without undue trauma

Fogarty Irrigation Catheter (Not shown)

Can be used to heparinize the arterial tree following embolectomy or venous thrombectomy

Fogarty® Clot Management Catheters

Specifications
